PARUL PAL

AI/ML INTERN | ASPIRING MACHINE LEARNING ENGINEER

PROFESSIONAL SUMMARY

BCA student and aspiring Machine Learning Engineer with hands-on experience in Python, Scikit-learn, NLP, data preprocessing, and machine learning model development. Built end-to-end ML projects in text classification and similarity analysis, along with web-based applications. Currently developing Vehline, a used-car marketplace platform, with a strong interest in AI/ML, problem solving, and practical product development.

WORK EXPERIENCE

AI/ML Intern 2025–2026
Pranovate IT Solutions Pvt. Ltd.

- Worked on machine learning solutions involving data preprocessing, feature engineering, model development, and evaluation.
- Applied Python and machine learning libraries to develop AI-driven solutions for practical use cases.
- Collaborated with development teams to implement ML-based solutions and improve model performance.

PROJECTS

Vehline — Used Car Marketplace
HTML | CSS | JavaScript | Flask | Git/GitHub

- Developing a web-based used-car marketplace connecting buyers and sellers.
- Implemented user authentication, registration, OTP verification, homepage, and vehicle browsing workflows.
- Designed the platform with a focus on secure buyer-seller interactions and scalable marketplace functionality.

AI-Based Plagiarism Detection System
Python | NLP | TF-IDF | Cosine Similarity

- Developed an NLP-based plagiarism detection system to identify similarity between documents.
- Implemented TF-IDF vectorization and Cosine Similarity for automated text similarity analysis.

Sentiment Analysis System
Python | Scikit-learn | NLP | Logistic Regression

- Built a machine learning classification system to categorize customer-review sentiment.
- Implemented text preprocessing, feature extraction, and Logistic Regression for sentiment classification.

Spam Message Detector
Python | Scikit-learn | TF-IDF | Machine Learning

- Developed a supervised ML model to classify SMS messages as spam or legitimate.
- Implemented text preprocessing, TF-IDF vectorization, model training, and evaluation.

OPEN SOURCE

GirlScript Summer of Code (GSSoC) — Contributor 2026
AI / Agents Track

- Participated in open-source development through the AI/Agents track and contributed through GitHub-based workflows.

EDUCATION

Bachelor of Computer Applications (BCA) Expected 2027
HI-Tech Institute of Engineering and Technology, Ghaziabad
CGPA: 7.8 / 10.0

ACHIEVEMENT

- **Academic Rank #1:** Secured 1st Position in BCA 2nd Year at HI-Tech Institute of Engineering and Technology.
